Ilios Cable Guide (Ray) and Drop Arm (Wing) Design Patented Awnings

The Expression of Passion & Innovation - using a round profile that allows for both a screen or drop arm application.

Winner of the 2012 Red dot design award, Ilios is the new ShadeLAB superstar in the drop awning sector. Clean, Elegant, technologically innovative, with excellent performance and wide installation variants, it is the expression of the ShadeLAB team passionate work!

ILIOS is available in 4 different versions to better suit private and commercial applications: with full housing or open-roll with only brackets, with steel cable guides or with tensioned arms. ShadeLAB vocation for research and testing has enabled it to engineer a unique solution in the market, particularly apt for WING and RAY versions: a terminal bar that perfectly integrates inside the box, always enabling a hermetic (completely sealed and watertight) enclosure. Ilios can be installed on the wall and ceiling and offers a great advantage: maintenance and change of fabric/motor can be removed without uninstalling the awning. Thanks to the practical SMART-BOX system, the front cover can be removed quickly and effortlessly. There are no visible screws

which provide a clean and elegant design. The maximum size of the awning with acrylic fabric is 16'5" (197") width with 9'10" (118") height, while with screen fabric it can reach a 14'9" (177") height.

Standard Frame colors available for the Ilios are White Sable, Anthracite, & Corten - all finishes are matte.

Complete line of awning fabrics available, featuring our Para Tempotest line of 100% acrylic awning material.

The Ilios is a patented system.

Standard Frame Color Options (all 3 are matte finish)

*these are printed images of the finish & should not be used for final production specifications.
*RAL custom frame colors are available at an upcharge.
